

New Software Release FORD® 2019 - ADS2269 FIRST AFTERMARKET SOLUTION IN THE WORLD

March 2019

Advanced Diagnostics is pleased to announce the release of Ford 2019 ADS2269 software for the Smart Pro only. The new software is for programming proximity keys on various Ford & Lincoln vehicles worldwide.

What does the software do?

ADS2269 software is designed specifically to program proximity keys for 2018-2019 vehicles. Also, earlier model year vehicles that have been into a dealership and received a security software update. ADS2269 will bypass the security pincode during the procedure and will program the remote and the transponder at the same time. No working key is required and there is an add key option available.

There is also a special procedure designed to allow programming even if the factory alarm system is activated.

What else will I need?
